

# 2024 Family Engagement Month Tool Kit

## What is Family Engagement?

Families are engaged when they partner with early learning programs to promote their children's development, learning and wellness. Positive relationships between families and staff in early learning programs are the foundation for family engagement.

**Family - ELCPH - Providers**

## Partnering with Families for Children's Success

Family engagement supports school readiness for early grade success and prepares children for life. Family engagement is a shared responsibility of the Division of Early Learning, early learning coalitions and community partners, and providers to engage families in meaningful ways to actively support their children's learning, development and wellness.
